What is Care Management Services?

Piatt County Nursing Home has seen a growing need for assisting older adults in navigating the services available to them in the Piatt County area. As the continuum of healthcare options grows, care decisions become more complicated. Care Management Services can answer or simplify this process for older adults and their families. Care Management can answer such questions as “where do I go for help – what kind of help is available – how do I access the right service – who can steer me in the right direction?”

Care Management Services has been developed to serve as the road map on your excursion for help. A professional sits down with you over one visit or several, evaluates your needs, and points you in the right direction. It simplifies the task of defining the routes available, allowing you (the driver) to weigh the pros and cons of each and select the route (path) which meets your needs and desires.

What services are provided?

- Evaluate ability to manage daily living
- Evaluate living options
- Plan for long-range care options
- Identify possible modifications/adaptations to home and/or environment which may improve safety and independence
- Evaluate potential for support from family and community
- Assistance with long distance care management
- Teaching and education
- Linkage/referral services

Who is eligible for Care Management Services?

- Older adults that reside in the Piatt County area and are interested in exploring options for care or living arrangements.
- Older adults seeking options for services for chronic health problems and terminal illness.

Who provides the service?

- Experienced professionals in older adult care are available to provide information and services. It may be a social service professional, care manager, or nurse.

Where is Care Management Service offered?

- In most cases, the Care Management professional will make arrangements to visit the home of the older adult. Occasionally, a consultation can be arranged via telephone.
